

Phase 6 – Project Testing Phase

PROJECT: EduGenie – Google Gemini Powered Learning Assistant

OBJECTIVE

To verify that every EduGenie feature works correctly and produces the expected output.

FUNCTIONAL TESTING

Test 1 – Question Answering

Input: A general or academic question.

Expected Result: EduGenie provides an AI-generated answer.

Test 2 – Concept Explanation

Input: A complex topic.

Expected Result: The topic is explained in simple and readable language.

Test 3 – Quiz Generation

Input: A topic or text.

Expected Result: Quiz questions are generated with four options and correct answers.

Test 4 – Summarization

Input: A long educational paragraph.

Expected Result: A concise summary containing the key information is displayed.

Test 5 – Learning Recommendation

Input: A learning topic.

Expected Result: A structured learning path from beginner to advanced level is generated with learning resources.

PROCEDURE

- 1 Start the FastAPI application.
- 2 Open the application in a browser.
- 3 Test each task one by one.
- 4 Check the API response and frontend output.

- 5 Verify quiz formatting and answer handling.
- 6 Check error handling for invalid or incomplete responses.
- 7 Fix issues found during testing.
- 8 Repeat testing after corrections.
